24" TO 60" WIDE

4 DESIGN & FINISHING TIPS

PLANNING THE SPACE

Ensure your bathroom is properly measured and reviewed prior to finalizing your cabinet order. When designing your bathroom, consider room size and elements such as windows, doors, toilet location, plumbing, electrical outlets and door clearances, as they will influence your layout and cabinet selections.

ACCESSORIES

Crown Molding, Vanity Dressing Drawers, Linen Cabinets, Hutches and Laundry Hamper Kits, add detail to enhance the appearance and maximize storage for your bathroom.

TOE KICKS AND FILLERS

Toe Kicks provide an elegant furniture look to your bathroom cabinets and are offered in all finishes and styles. When designing your layout, Fillers can be added to balance out your available area and fill space.

CABINET LAYOUT

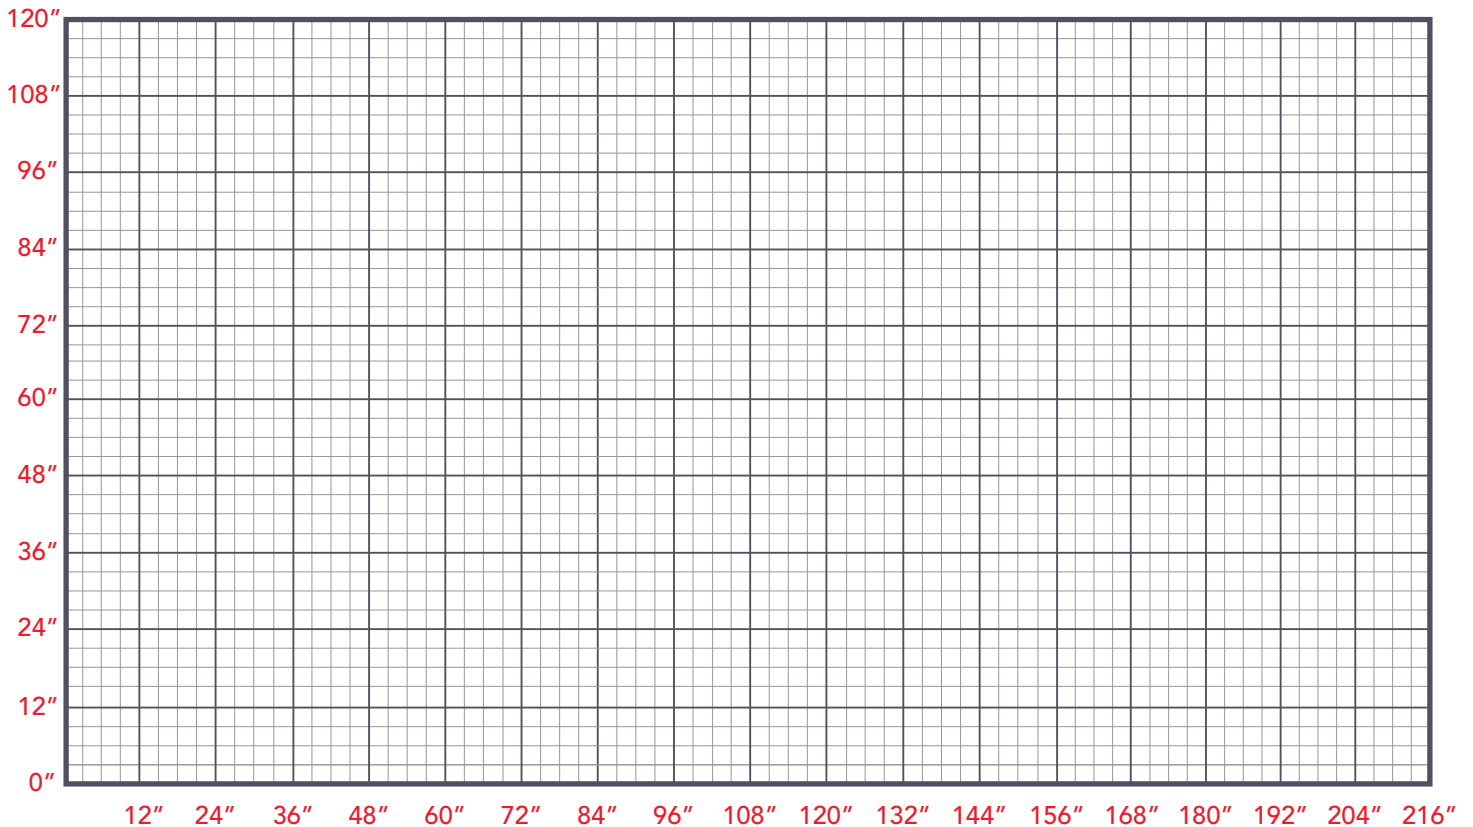

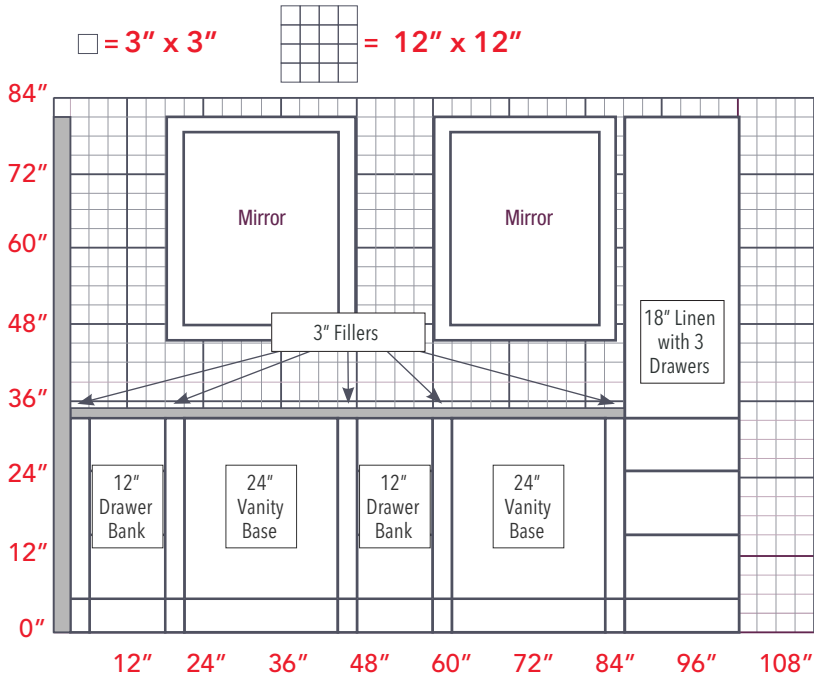

When cabinets are placed next to walls, a filler must be used to separate the cabinets from the wall to prevent the doors and drawers from rubbing.

SINK LOCATION

Keep in mind that sinks can only be placed on Vanity Bases, and not Drawer Banks. Sinks cannot be placed on 18" wide Vanity base.

Use this scaled working grid to design your bathroom plan. A sample diagram is shown below for reference. A store associate can assist with your selection and ordering process.
